

## **TransChart** **Senior Software Engineer**

### **TransChart**

Since 1996 TransChart has focused exclusively on helping transplant programs improve the workflow of their operation, maximize reimbursements and comply with the complex and ever-changing landscape of regulatory requirements.

Drawn from the experiences of a leading academic medical center, the TransChart system addresses the real-life needs for research, patient tracking, cost reimbursement and management oversight of the most complex set of services in health care today.

TransChart provides a flexible working environment with competitive salary, health insurance, retirement savings plan with employer matching and paid time off including comp time.

E-mail your resume to [careers@transchart.org](mailto:careers@transchart.org).

### **Senior Software Engineer**

TransChart is looking for a self-motivated and ambitious Senior Software Engineer to work on web-based medical software for hospitals. Get in on the ground floor as we evolve the architecture and expand the product into new areas while supporting and migrating the existing customers. The ideal candidate must be comfortable dealing with diverse customer environments, multi-tasking, and using both old and new Microsoft technologies.

### **Responsibilities**

- Complete independent software development tasks against specified project time frames, quality, and requirements
- Lead software development projects and deliver against specified project time frames, quality, and requirements.
- Conduct unit, integration, and system testing on own code and fix errors
- Perform peer reviews on code from other developers
- Develop and execute test plans
- Troubleshoot and fix defects in existing systems as assigned
- Develop components of overall solutions using iterative and fast prototyping methodologies
- Participate in or lead design sessions
- Provide escalation support for technical issues from customers
- Participate in product roadmap sessions
- Mentor interns and junior developers
- Provide technical expertise to Sales, Marketing, and Support

### **Required**

- BS in Computer Science or equivalent
- Excellent problem solving skills
- Relational database query skills including database design and maintenance (Microsoft SQL preferred)
- Experience developing web-based applications using Microsoft technologies
- Ability to work well both independently and as a member of a team
- Ability to work on or lead multiple project teams simultaneously

- Excellent verbal and written communication skills
- Excellent project management skills

**Desired**

- Commercial software development experience using .NET
- Experience with Microsoft based Web Applications and Web Services using Microsoft Visual Basic and Microsoft .Net technologies
- Experience with a version control system and configuration management
- Experience managing direct technical reports
